Dear Colleagues:

It is a great pleasure and honor for us to invite you to the International Symposium on HAM and CHOPs – Modern Trends in Leukemia and Lymphoma in Munich, scheduled for May 22 – 23, 2009 on the occasion of Prof. Wolfgang Hiddemann’s 60th Birthday.

As a co-worker and friend of Prof. Hiddemann it is my great pleasure to invite you to celebrate his birthday with us in Munich, looking back on many years of mutual endeavour and efforts to achieve progress in the understanding of the diseases and even more to improve the prognosis of patients suffering from acute leukemias and lymphomas.

In order to make this meeting a special event a forum for information and exchange at the highest level, the members of the organizing committee have been working on a program, which reflects both, the progress which has been made during the last few years but also the perspectives on the fields of leukemia and lymphoma. The sessions will be led again by internationally renowned speakers, featuring a variety of topics and giving the opportunity to discuss advances and perspectives of treatment strategies.

The organizing committee and I are looking forward to an exciting Symposium.

Please mark your calendar and participate in this special event.

Yours

Helmut Ostermann
