AG Risikoanalyse (ISAR)

Publikationen aus der Arbeitsgruppe im Jahr 2004:

BEITRÄGE IN INTERNATIONALEN FACHZEITSCHRIFTEN

Bailiff I.K.*, Stepanenko V.F., Göksu H.Y., Botter-Jensen L.*, Brodski L.*, Chumak V.*, Correcher, V.*, Delgado, A.*, Golikov V.*, Jungner H.*, Khamidova L.G.*, Kolizshenkov T.V.*, Likhtarev I.*, Meckbach R., Petrov S.A.* and Sholom S.*: **Comparison of retrospective luminescence dosimetry with computational modeling in two highly contaminated settlements downwind of the Chernobyl NPP**. Health Phys. 86, 25-41 (2004)

Bailiff I.K.*, Stepanenko V.F.*, Göksu H.Y., Jungner H., Balmukhanov S.B.*, Balmukhanov T.S.*, Khamidova L.G.*, Kisilev V.I.*, Kolyado I.B.*, Kolizshenkov T.V.*, Shoikhet Y.N.* and Tsyb A.F.*: **The Application of retrospective luminescence dosimetry in areas affected by fallout from the Semipalatinsk nuclear test site: an evaluation of potential**. Health Phys. 87, 625-641 (2004)

Bernhardt Ph., Friedland W., Paretzke H.G.: **The role of atomic inner shell relaxations for photon-induced DNA damage**. Radiat. Environ. Biophys. 43, 77-84 (2004)

El-Faramawy N.A., Göksu H.Y. and Panzer W.*: **Thermoluminescence dosimetric properties of a new thin beta detector (LiF:Mg,Cu,P;GR-200F) in comparison with highly sensitive Al₂O₃:C beta dosimeters**. J. Radiol. Prot. 24, 273-282 (2004)

Gavrilin Y.*, Khrouch V.*, Shinkarev S.*, Drozdovitch V.*, Minenko V., Shemiakina E.*, Ulanovsky Al., Bouville A.*, Anspaugh L., Voilleque P., Luckyanov N.*: **Individual thyroid dose estimation for a case-control study of Chernobyl-related thyroid cancer among children of Belarus - Part I: ¹³¹I, short-lived radioiodines (¹³²I, ¹³³I, ¹³⁵I), and short-lived Radiotelluriums (^{131m}Te and ¹³²Te)**. Health Phys. 86(6), 565-585 (2004)

Gering F.*, Weiss W.*, Wirth E.*, Stapel R.*, Jacob P., Müller H. and Pröhl G.: **Assessment and evaluation of the radiological situation in the late phase of a nuclear accident**. Radiat. Prot. Dosim. 109, 25-29 (2004)

Gering F., Richter K. and Müller H.: **Combination of measurements and model predictions after a release of radionuclides**. Kerntechnik 69, 5-6 (2004)

Gómez-Ros J.M.*, Pröhl G. and Taranenko V.: **Estimation of internal and external exposures of terrestrial reference organisms to natural radonucleides in the environment**. J. Radiol. Prot. 24, A79-A88 (2004)

Heidenreich W.F., Collier C.*, Morlier J.P.*, Cross F.T.*, Kaiser J.C. and Monchaux*: **Age-adjustment in experimental animal data and its application to lung cancer in**

radon-exposed rats. Radiat. Environ. Biophys. 42, 183-188 (2004)

Howard B.J.*, Semioschkina N., Voigt G.*, Mukusheva M.* and Clifford J.*: **Radiostrontium contamination of soil and vegetation within the Semipalatinsk test site.** Radiat. Environ. Biophys. 43, 285-292 (2004)

Jacob V. and Jacob P.: **Modelling of carcinogenesis and low-dose hypersensitivity: an application to lung cancer incidence among atomic bomb survivors.** Radiat. Environ. Biophys. 42, 265-273 (2004)

Kaiser J.C. and Heidenreich W.F.: **Compare regression methods for the two-stage clonal expansion model of carcinogenesis.** Statist. Med. 23, 3333-3350 (2004)

Kaiser J.C., Heidenreich W.F., Monchaux G.*, Morlier J.P.* and Collier C.G.*: **Lung tumour risk in radon-exposed rats from different experiments: comparative analysis with biologically based models.** Radiat. Environ. Biophys. 43, 189-201 (2004)

Kis Z.*, Eged K.*, Voigt G.*, Meckbach R. and Müller H.: **Modeling of an industrial environment: external dose calculations based on Monte Carlo simulations of photon transport.** Health Phys. 86, 161-173 (2004)

Kruk J.E.*, Pröhl G. und Kenigsberg: **A radioecological model for thyroid dose reconstruction of the Belarus population following the Chernobyl accident.** Radiat. Environ. Biophys. 43, 101-110 (2004)

Li W.B., Friedland W., Jacob P., Panyutin I.G.* and Paretzke H.G.: **Simulation of ¹²⁵I decay in a synthetic oligodeoxynucleotide with normal and distorted geometry and the role of radiation and non-radiation actions.** Radiat. Environ. Biophys. 43, 23-33 (2004)

Semioschkina N., Voigt G.* Mukusheva M.* Bruk G.*, Travnikova I.* and Strand P.*: **Assessment of the current internal dose due to ¹³⁷Cs and ⁹⁰Sr for people living within the Semipalatinsk test site, Kazakhstan.** Health Phys. 86, 187-192 (2004)

Taranenko V., Pröhl G. and Gómez-Ros J.M.*: **Absorbed dose rate conversion coefficients for reference terrestrial biota for external photon and internal exposures.** J. Radiol. Prot. 24, A35 - A62 (2004)

Ulanovsky A., Drozdovitch V.* and Bouville A.*: **Influence of Radionuclides distributed in the whole body on the thyroid dose estimates obtained from direct thyroid dose estimates obtained from direct thyroid measurements made in Belarus after the Chernobyl accident.** Radiat. Prot. Dosim. 112, 405-418 (2004)

Veronese I., Giussani A.*, Göksu H.Y. and Martini M.*: **The trap parameters of electrons in intermediate energy levels on quartz.** Radiat. Meas. 38, 743-746 (2004)

Veronese I., Giussani A.*, Göksu H.Y. and Martini M.*: **Isothermal decay studies of intermediate energy levels in quartz.** Radiat. Environ. Biophys. 43, 51-57 (2004)

BUCHBEITRÄGE

Streffler C.*, Bolt H.*, Follesdal D.*, Hall P.*, Hengstler J.G.*, Jacob P., Oughton D.*, Prieß K.*, Rehbinder E.* and Swaton E.*: **Low Dose Exposures in the Environment**. Springer-Verlag Berlin Heidelberg 2004

GSF - BERICHTE

Fiedler I., Voigt G., Lochard J.* Croüail P.*, Nisbet A., Mercer J., Green N.* and Wikins B.*: **Review of Infrastructures and Preparedness Systems in France, Germany and United Kingdom for Potential Releases of Radioactivity into the Environment**. GSF - Bericht 05/04

Pröhl G., Oyslaegers G.*, Zeevaert T.*, Kanyar B.*, Pinedo P.*, Simón I.*, Bergström U.*, Hallberg B.*, Mobbs S.*, Chen Q.* and Kowe R.*: **Biospere Models for safety assessment of radioactive waste disposa**l. GSF - Bericht 06/04
